MICHELE PLACHTER

With a home base in Philadelphia and satellite offices in South Florida, Michele Plachter Design is an exclusive, full-service design firm that can do it all. Specializing in whole-home services, the team prides itself on curating interiors that tell the client's story. MPD collaborates with the finest artisans, contractors and architects in the industry to deliver uniquely gorgeous yet functional spaces. MPD has a five-star reputation with clientele and team members are known for being accomplished, passionate and professional from start to finish.

With an entrepreneurial spirit, discerning eye and a quest to bring more beauty into the world, Plachter channeled her natural talents into interior design two decades ago and has never looked back. Purposeful and conscientious, Plachter oversees all projects and strategically grows her team with the best and brightest talent in design. She has an ability to decipher her clients' personalities into their external environment. For Plachter, it's not about branding her look, but instead making sure that what she's delivering to her clients is a coherent story of who they are.

From Architectural Digest to House Beautiful, MPD is frequently featured in web, print and television media. "One of my top goals for every project is to ensure our designs have the element of a soul," Plachter says. "We bring our clients' narrative to life and strive to make the experience and results life changing. Be it classic or modern, it's their home, after all. We just take our clients' vision to the next level."
